

Assessment Summary for Church Meetings and Work

Due to the changing nature of church life in the pandemic, facts have become more important than ever.

When requirements are clearly defined by law and congruent with belief in Christ, we encourage you to come to your own decision for how church life should function in your local context. The below assessment summary may help you to do this.

To use this assessment summary, allocate one person to keep it updated as government information changes. Briefly describe the rule, enter the reference from the appropriate source, and pass it over to the elders or leaders to define how the church will respond.

This can then be used by various staff and volunteers as they prayerfully plan what church life should look like in your particular context.

	Rules	Reference	Elders/Leadership decision
Date:
