Engaging Families and Children Beyond Sunday

Discuss:

When you think about the families connected to your church, what does everyday faith look like for them?

In what ways could we support or equip families to weave faith naturally into their daily routines – at home, at school, and in the community?

Discuss:

Have you found any simple or creative ways to connect with families during the week — through schools, sport, or community events?

What impact have you seen when those connections happen?

Discuss:

What would it look like for your church to be a *trusted presence* in the community - not just running programmes, but building relationships where faith can be shared naturally?

Discuss:

How might serving together become a way of growing faith and discipleship in families?

Have you seen examples of this in your context? What helped it happen?
